

With the Avira WebProtector for Windows PCs, you can control surfing in the Internet and prevent certain websites from being accessed. Available in individually configurable business version as well as family edition with predefined filter criteria according to the Child and Youth Protection.

Solutions

- ▶ **Business for AVM KEN! 4**
- ▶ **Family for AVM KEN! 4**
- ▶ **Avira WebProtector for workstations**

### THE CHALLENGE

Accessing certain Internet pages involves dangers and can be extremely problematic, if not illegal even. Everyone knows that content is also accessible via the Internet from which it makes sense to protect yourself – just think about pornographic, extremist and fraudster sites. Further hazards proceed on the assumption that by only looking at the pages, viruses, worms, adware, spyware and other sadware can spread. However, private surfing to respectable Internet sites is not always desirable either, for example during working hours or by children and youths who do not observe certain rules of their parents. The differentiated regulation and censoring of Internet access rights and surfing habits is therefore a responsible step by companies and families to make use of the Internet more secure and more efficient.

### THE SOLUTION

Avira WebProtector is a leading technological security solution to filter unwanted or illegal Internet content. The software available for businesses and private users is based on the world's most efficient URL filter list. It contains more than 67 million entries, based on an analysis of 5.8 billion Internet pages. All Internet contents are categorized in content groups and updated, adapted and extended daily with the aid of a special "WebLearn function".

In addition to its outstanding filter function, Avira WebProtector is characterized in particular by the fact that filter settings carried out by the administrator cannot be altered. The patented RBCD technology ensures that unauthorized deletion or circumvention of the security software is impossible.

WebProtector does not only focus on English speaking key words. The program also blocks German and European Internet offers. The user has an advantage as the efficiency of the filter performance is not limited from the very beginning.

Avira WebProtector is easy to install. It supports all commonly used browsers and works independently of dial-up.

Control who can access the Internet, when and where

## Avira WebProtector

### SCOPE OF SUPPLY

- ▶ Avira WebProtector offers you the possibility to block or unblock Internet contents according to predefined criteria and user profiles
- ▶ Filters based on one of the world's leading and largest URL database, which contains more than 67 million entries (date: August 2006). It is updated daily with approx. 50,000 new websites and pictures
- ▶ Classification possibilities through 62 predefined categories, for instance society (sects, job search), (music, humor, online purchase), communication (web mail, anonymous proxies, chat, e-cards), finance (home banking, gambling games), drugs, weapons, pornography, criminality (illegal activities, eroticism, hacking, violence)
- ▶ Solutions not only tailored to Internet contents of American and other English speaking pages, but particularly also of German and European Internet contents
- ▶ Creation of user-specific surfing profiles for up to 1,000 users: rights, times, categories. You can thus create an individual rulebook with surfing time budgets for each of your users – for example your children of different ages
- ▶ Time and time zone protection – therefore you can authorize the lunch break from 12 noon to 2 p.m., for example, for surfing
- ▶ Blocking of data downloads
- ▶ Absolutely crack-proof, manipulation-proof solution. Built-in blocks cannot be circumvented or undermined
- ▶ Monitoring and logfile creation – you have full control of the system at all times and can create reports at any time if required and access documents
- ▶ Available in home-user and business versions and as a for AVM KEN! 4 (already pre-installed there)

### YOUR ADVANTAGES

#### Secure Internet – not an illusion with WebProtector

- ▶ Simple, fast installation, childishly simple management
- ▶ Filter function cannot be manipulated or circumvented
- ▶ Individually adjustable filter rules for different target groups and user groups (business-/premium version)
- ▶ Works with all types of Internet accesses, supports all commonly used browsers

#### Low costs, best precautions to prevent damage

- ▶ Reduction in administration costs through easy operability
- ▶ Prevents misuse or unwanted use of the Internet by company personnel and thus reduces the risk of possible damage

## ABOUT AVIRA

Avira is a worldwide leading supplier of self-developed security solutions for professional and private use. With more than twenty years of experience, the company is one of the pioneers in this field.

The security expert has several locations in Germany and partnerships in Europe, Asia and America. At its headquarters in Tettngang near Lake Constance, Avira is one of the region's largest employers with more than 180 employees. Worldwide more than 250 persons are employed and their work regularly wins awards. Avira AntiVir Personal, used by millions of private users, represents a significant contribution to security.

Avira's national and international customers include renowned corporations listed on the stock exchange but also educational institutions and public authorities. In addition to protection of the virtual environment, Avira also provides for more protection and security in the real world by supporting the Auerbach Foundation. Established by the founder of the company, the Auerbach Foundation promotes charitable and social projects as well as the arts, culture and science.

## AVIRA – PRODUCTS FOR YOUR IT SECURITY

More than security – for private users as well as for businesses of any size. Avira offers you innovative and efficient IT security solutions to protect computers and networks.

### Avira CIA Commander

#### ► Your emergency system for system and data access

The Avira CIA Commander boots defective or no longer accessible Windows systems in a few seconds from a CD into a graphical user interface. The individual modules and the assistants of the CIA Commander offer fast and simple access to the system and files and help to diagnose and eliminate error sources.

### Avira DriveNet

#### ► The versatile remote recovery solution for emergency use

With Avira DriveNet it is possible to easily mount all remote hard drives in LAN/WAN/Internet via any network connections – even without a functioning operating system on the remote computer.

### Avira UnErase

#### ► Simple recovery of deleted files

Avira UnErase recovers deleted data that are no longer in the system's trash within the framework as far as technically possible. The files that were deleted by viruses or uninstallers will appear again if desired, as long as they can be recovered.

### Avira NTFS4DOS

#### ► Your assistant to repair damaged Windows installations

NTFS4DOS offers read and write access from DOS to NTFS drives and thus enables a large number of DOS programs to access NTFS-formatted drives. Due to the low installation size, NTFS4DOS can be ideally saved on a USB stick or a boot diskette. Also available as OEM solution.

### Avira AntiVir

#### ► Cross-platform protection against viruses and malware

Avira AntiVir security solutions are available for all network levels. They protect businesses and private users against viruses and malware of any kind and are regularly awarded for its fast and high detection rate.
